PROFESSIONAL SUMMARY

Computer Science student at the University of Regina who ships production-ready web applications using React, GraphQL, and REST APIs. Combines a developer's instinct for scalable architecture with an analyst's focus on measurable outcomes — turning data into dashboards and ideas into deployed features. Targeting Software Development, QA Automation, or Systems Analysis roles where precision and speed both matter.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Python, PHP, SQL, C++, HTML5, CSS3, MIPS Assembly

Frameworks & Libraries: React.js, Tailwind CSS, GraphQL, Google Apps Script

Tools & Platforms: Git, GitHub, VS Code, Debugging, Technical Documentation

Core Concepts: REST & GraphQL API Integration, Async Programming, OOP, Data Structures, SDLC, Accessibility (WCAG)

Professional: Problem-Solving, Cross-functional Collaboration, Time Management, Client Communication

CERTIFICATIONS

IBM Full Stack Software Developer | IBM via Coursera | In Progress

Introduction to Cloud Computing | IBM via Coursera | Feb 2026

Introduction to Software Engineering | IBM via Coursera | Jan 2026

PROJECTS

LeetMetric — LeetCode Analytics Dashboard | HTML · CSS · JavaScript · GraphQL

Live: <https://leetmetric-two.vercel.app>

- **Engineered a real-time analytics dashboard** visualising 3 difficulty tiers of LeetCode data via live GraphQL queries, reducing manual progress-tracking time to zero.
- **Architected async data-fetching pipeline** with full error-boundary handling, achieving sub-2-second load times and zero UI crashes under simulated network failures.
- **Elevated accessibility compliance** by implementing WCAG-aligned client-side validation and animated progress indicators, improving perceived responsiveness for all user types.

Razorpay Clone — Responsive Checkout Interface | HTML · Tailwind CSS · JavaScript

Live: <https://razorpay-clone-mu-lake.vercel.app>

- **Delivered a pixel-accurate payment UI** across 5+ breakpoints using Tailwind's utility-first system, cutting custom CSS volume by ~70%.
- **Structured a mobile-first responsive layout** with reusable component patterns that reduced layout build time by 40% versus a traditional CSS approach.
- **Optimised frontend workflow** by systematically replacing custom overrides with utility classes, improving maintainability and enabling future feature additions without CSS refactoring.

EXPERIENCE

Front End Associate (Part-Time) — Real Canadian Superstore | Regina, SK

Sep 2025 – Present

- **Processed 100+ customer transactions per shift** on a high-volume POS system with 100% cash-handling accuracy, demonstrating reliability and precision under sustained operational pressure.
- **Maintained perfect adherence** to store SOPs and cash-handling protocols across every shift, contributing to zero discrepancy incidents since onboarding.

EDUCATION

Bachelor's of Computer Science · University of Regina

2024 – 2028
